

OptConnect ascend dura

Quick Start Guide

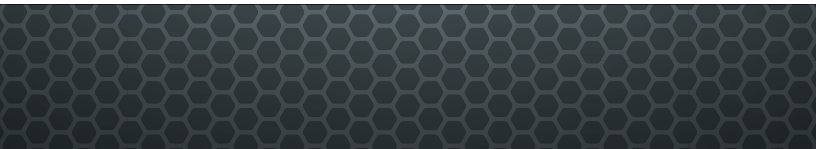

Welcome to OptConnect ascend dura

OptConnect ascend dura features 4G LTE CAT 4 connectivity and dual-carrier redundancy. Built for industrial IoT applications that require higher speed, with Wi-Fi, 1 WAN and 3 LAN ports, always-on connection, greater bandwidth for flexible interfaces, and real-time monitoring and management.

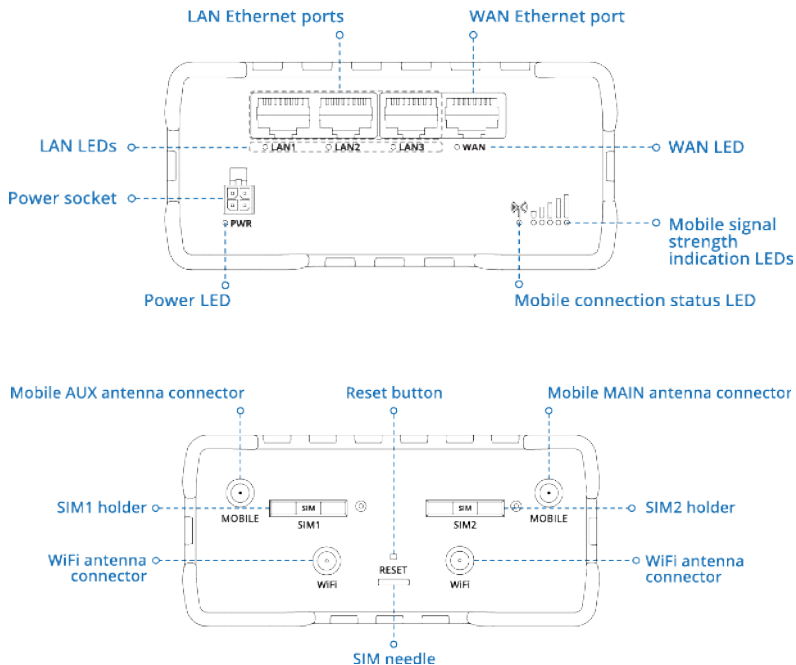

Dual-Carrier, Wi-Fi, and Ethernet Connectivity

The ascend dura is activated on both Verizon and AT&T networks, which means that if one network goes down, ascend dura automatically switches carrier networks guaranteeing your equipment stays connected.

Flexibly and securely connect internally via WiFi and Ethernet. Support up to 100 simultaneous connections over WiFi as well as 1 WAN and 3 LAN Ethernet ports to easily handle connected devices in challenging device layout environments.

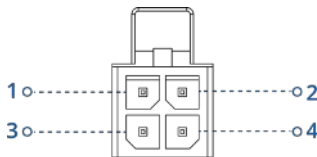

Identify ascend dura

Simple steps to Place, Plug & Play

1. Attach the MAIN and AUX antennas to connectors labeled mobile.
2. Attach the Wi-Fi antennas to connectors labeled Wi-Fi.
3. Attach the power adaptor to the power socket on the front of the device. Then plug the other end of the power adaptor into your power outlet.

NO.	DESCRIPTION	WIRE COLOR
1	Power	Red
2	Ground	Black
3	I/O	Green
4	I/O	White

4. As needed, attach ethernet ports to equipment and this device following labels LAN/WAN.

FAQ

How do I log in to ascend dura?

There is no log in for ascend dura. OptConnect manages all aspects of device as part of our Managed Wireless Services.

How do I change ascend dura's IP address, firewall settings, etc.?

Each ascend dura you receive is configured to your specifications before it arrives. The ascend dura does not need to be configured on site unless your equipment/application requirements have changed. Contact our Customer Care Center at 877.678.3343 to adjust the device's configuration.

How do I get support?

Contact our Customer Care Center at 877.678.3343

Let us show you why thousands of customers have made OptConnect the leading IoT managed services provider for headache-free cellular connectivity with award-winning products and top-rated customer service.
